

# TRANSPARENCY REPORT

**Date: July 01, 2024**

on July 1, 2024, a [legal request](#) sent to Google LLC to [censor 3 articles](#) from Google Search results was stored in Lumen Database, 2 articles were from "osintguardian.com" and the other was hosted on "medium.com". The 3 articles talked about the pedophile network that operated on "smutty" and other websites. The legal request came from Italy.

We do not know Google LLC's response but we do know that Sathia Francesco Musso (founder of Child Sexual Abuse Material website) also sent a [legal request](#) using the European Union's GDPR data protection law to try to censor Google Search results.
